CROSS REFERENCE TABLE:**

**THE MANIFEST FILE COPY
AND
THE CATEGORIZED INTERNAL SHIPPING DOCUMENTS
FOR YEARS 1975 THROUGH 1985**

JULY 26, 1991

NOTES ON PREPARATION OF THE
NONRADIOACTIVE DANGEROUS WASTE LANDFILL
WASTE DISPOSAL PACKET CROSS REFERENCE TABLE

1. The file copy of the Nonradioactive Dangerous Waste Landfill (NRDWL) disposal records for the operational years 1975 through 1985 were reviewed and assembled into waste disposal packets.
2. A waste disposal packet is a collection of documents describing a single disposal event. The collection of documentation generally consists of a Request for Disposal and may include a list of chemicals and a letter specifying additional information pertinent to the disposal event. A disposal event is defined as a waste shipment received at the NRDWL on a given day for disposal and is generally associated with a single originating location, a single generator, or a specific chemical or asbestos waste item or group of items.
3. Waste disposal packets were chronologically sorted before disposal packet numbers were assigned. The disposal packet number is composed of the letter P (for packet), the last two digits of the year in which disposal took place, and a consecutively assigned three digit number starting with 001 for the first packet of each year (i.e. P75-001 or P83-001)
4. Information supporting preparation of the cross-referenced table was either extracted directly from the disposal packets or estimated based on the methodology described below.
5. The date of disposal used in the table is the date that the NRDWL facility operator accepted waste from the transporter for disposal. The date of the disposal identified from the disposal record or the shipping manifest is used, if available. If the date of the disposal is not given, then the most recent date of the following is used (followed by an asterisk to indicate an assumed or estimated date):
 - Date presented in the packet as the date the disposal request is approved.
 - Date presented in the packet as the date disposal is required.
 - Date referenced in a letter pertinent to the disposal or the date on a document describing the disposal event.
 - Used judgement and explain in the comment column.

6. Records documenting disposal for a given year were assigned page numbers in the initial submittal of the file copy, "Manifest Records for Years 1975-1985", on February 14, 1991. Records are numbered consecutively for each year beginning with 0000001. For the sake of brevity and clarity, the page numbers or range of page numbers used in this table are composed of the last two digits of the given year followed by the last three digits of the previously assigned numbers (i.e. 78-001, 81-236-238). Generally all documents relating to a single disposal event are arranged in consecutive order. Occasionally, however, disposal packets contain related documents out of consecutive order. Some pages are related to more than one disposal event and appear in more than one packet.
7. Generally, the disposal record packages contain information on the waste that was disposed only at the NRDWL. However, some waste disposal events have final disposal locations other than NRDWL, have unconfirmed disposal locations or have two or more final (partial) disposal locations. Other final disposal locations consist of the 2727-S/200W Offsite Staging Facility, United Nuclear Industries Landfill, Hanford Solid Waste Landfill, Hanford sanitary trenches, 200W burial area, or unidentified offsite locations. Listed in this table are waste disposal events that include the NRDWL as a final disposal location. Partial disposal events have been retained in this table and have also been segregated by year and placed in a separate document. In addition, disposal events that have other disposal locations and are unconfirmed by that particular facility have been retained in this table as a "May have been Disposed of at NRDWL" (e.g. P83-049). All disposal events having been identified as having been disposed of at an other facility have been forwarded to that particular facility.
8. The trench number is the number of the chemical or asbestos trench where waste was disposed. The trench number on the disposal record is used, if available. If the trench number is not available, then it is assigned one of the following, giving priority in the order listed.
 - Trench number designated on the Central Landfill log included in the disposal record packages. (Applicable for years 1981, 1982, 1983)
 - Trench number described in the 19N excavation summaries.
 - Number of the trench that was open at the time when the disposal event was to have occurred based on operational dates. (If this method was used an asterisk was placed after the trench to indicate an estimated or assumed trench number). According to operational dates assigned to each trench in the NRDWL

Closure\Post Closure Plan (see figure 1), both chemical trenches 28 and 31 were open for operation between February through April of 1984 and both asbestos trenches 21 and 25 were open for operation between January through March of 1984. Therefore, both trenches were listed as being possible final disposal trenches for the waste disposed of between those dates.

9. Any waste that was disposed in an asbestos trench is noted in the comment column of this table with the word asbestos. Generally, waste designated as going to an asbestos trench was clearly identified as asbestos in the waste disposal packets, however, other waste materials such as fiberglass or insulation were also designated as going to an asbestos trench. These were not differentiated on this table, only asbestos was listed in the comment column.
